Fall and winter terms.....	1,098 00
Carrying scholars.....	67 34
wood	103 65
	<hr/> \$1,723 49

Over drawn, \$55.78.

The overdraft is occasioned by not receiving as much from the State as last year, and also from the fact that the committee wished to have the usual length of terms of school.

This deficiency is largely made up by our having \$38 of undrawn free high school money on hand, so that our over draft really is \$17.78.

FREE HIGH SCHOOL ACCOUNT.

Undrawn March 1st, 1897.....	\$115 00
Paid Miss Angie Smith, teaching 8 weeks in dist. No. 6 at \$9	72 00
for taking care of schoolhouse and building fires.....	5 00
	<hr/> \$77 00

Free high school money undrawn, \$38.00.

The building committee elected for that purpose, have completed schoolhouse in district No. 1(so called)and we feel that it fully comes up to the requirements. We do not hesitate to venture the assertion that nowhere will a better school building be found for the money than this one.

The building is large and airy, and well ventilated and we feel that it fully meets the requirements of the district, as a model school building. It is a credit to the town, and we are sure that the build-

ing committee discharged their duties in a faithful and conscientious manner. We hope the good work thus begun will be continued by the town and a reasonable appropriation made each year for the building of new school buildings. The schoolhouses throughout the town are with only a few exceptions in a very poor condition and we believe that the policy already inaugurated of building one or more new ones each year will in a very few years provide us with modern school buildings, and at the same time the expense being distributed over several years will not entail a heavy burden on the tax payers of town.

The Committee appointed at the last annual meeting to redistrict the town for school purposes have attended to their duties and will report at this meeting. Their suggestions we heartily approve and we believe that if carried out will be a great benefit to the schools and the town.

The schools throughout the town the past year have been, we think on the whole, very successful. All were not up to the standard but taken as a whole we feel that they have been fully an average with rural schools anywhere. A grade has been established in the school in the village, and a three years course mapped out a copy of which is herewith inserted.

Successful school work cannot be done in our opinion without graded schools and we would respectfully urge upon the town the necessity of grading all the schools in town, thus placing them on a level with other schools in the county and state. We have been very much gratified the past year to note the increased interest in the schools by the parents of the children. Very much more interest has been shown in that direction than ever before and we are very sure that it has been very beneficial to the schools. We very strongly recommend that Free High school money be voted by the town this year, also that a liberal appropriation in addition to the amount required by law be raised for common school purposes.

All of which is respectfully submitted.
